

Establishing Specialized Technical Support and Field Research Centre for FSM and Non-Sewered Sanitation

Status: Ongoing

Project Partner: BORDA

Project Area: Dhangadhi, Amargadhi, Dakshinkali, Gorkha, Kohalpur, Lalbandi, Shukla Gandaki, Solu Dudhkunda

Project Duration: January 2017 – December 2018

Aim:

This project aimed to establish, visible, successful end-to-end FSM systems and to support governments to get the high quality, reliable and timely technical support they need so they can meet their sanitation goals.

Activity: Situational Assessment of Fecal Sludge Management in different Municipalities

Project Description:

For the quantification of faecal sludge from the corresponding municipalities, household survey in eight municipalities using standard questionnaire was conducted. The local enumerators were involved for the household survey along with supervisors from ENPHO. The survey data from the corresponding municipalities were analyzed to determine the situational status of the municipalities.

Project Outputs:

- Faecal sludge status diagram of the municipalities
- Faecal sludge situational assessment: 400 households in each municipalities were assessed

Major Achievements:

- Quantification of faecal sludge (m³/day) of the municipalities
- Faecal sludge status report of the municipalities
- Developed Faecal Sludge Management Factsheet of 8 municipalities
